ARTMOLDS

The Art of Imitating Life

Artists Serving Artists

Since 1994, ArtMolds has become a leader in the development and manufacturer of high quality molding and casting materials for special effects, prosthetics, sculptors, artists, taxidermy, mold making for statuary, figurines, models, tooling for professionals and hobbyists alike. Whether you are making candles, decorative soap, candy and food molds, casting body parts, preserving that trophy fish, creating rubber masks, or interested in creating realistic dolls, ArtMolds has a product that you can depend on.

Our materials can reproduce the finest detail. As you can see the photograph shown above is of a bust of Ed McCormick, founder of ArtMolds. It was created by

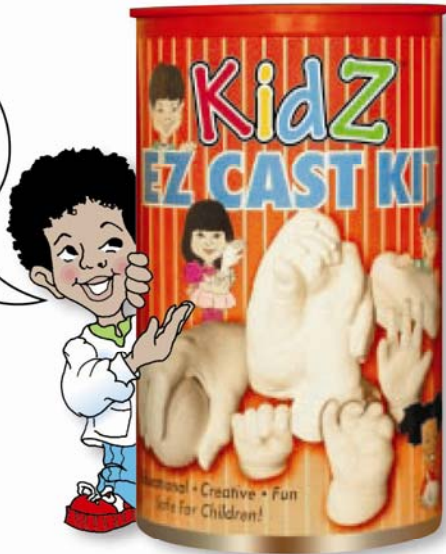

sculptor Roy Butler, ALI, from a head casting using skin safe tear resistant FiberGel. The mold was then cast in CastRite, cleaned up and a permanent mold was created using MoldRite two-part RTV silicone. The two-part silicone mold was delivered to the foundry where a wax casting was made to be used in the "lost wax" bronze pour technique. After casting the bust was cleaned up, patina acids were used to add highlight and shadow and it was then mounted on a marble pedestal.

We welcome all major credit cards. Open accounts may be established after credit review. All prices are in US dollars, F.O.B. Newton, New Jersey. Technical information and material safety data sheets are available on request. Please call or fax your request.

Meet The
KidZ™
 ...The HOT NEW
 Kit for '06!

Casting
 & Molding
 Kits

Our most popular kit because it is a multi-purpose casting kit for ages from new born to adults. You can cast baby's hand or foot or mom and baby's hand and a child's hand, too. Just follow the four EZ steps and you will have a beautiful casting that will last more than a lifetime. Unlike any of our other baby and children's kits this multi-purpose kit gives you plenty of artistic options, too.

You can cast baby's hand or hands, or chose to cast a foot as well. You can also have a casting of a child's hand either holding a ball or favorite object. As a

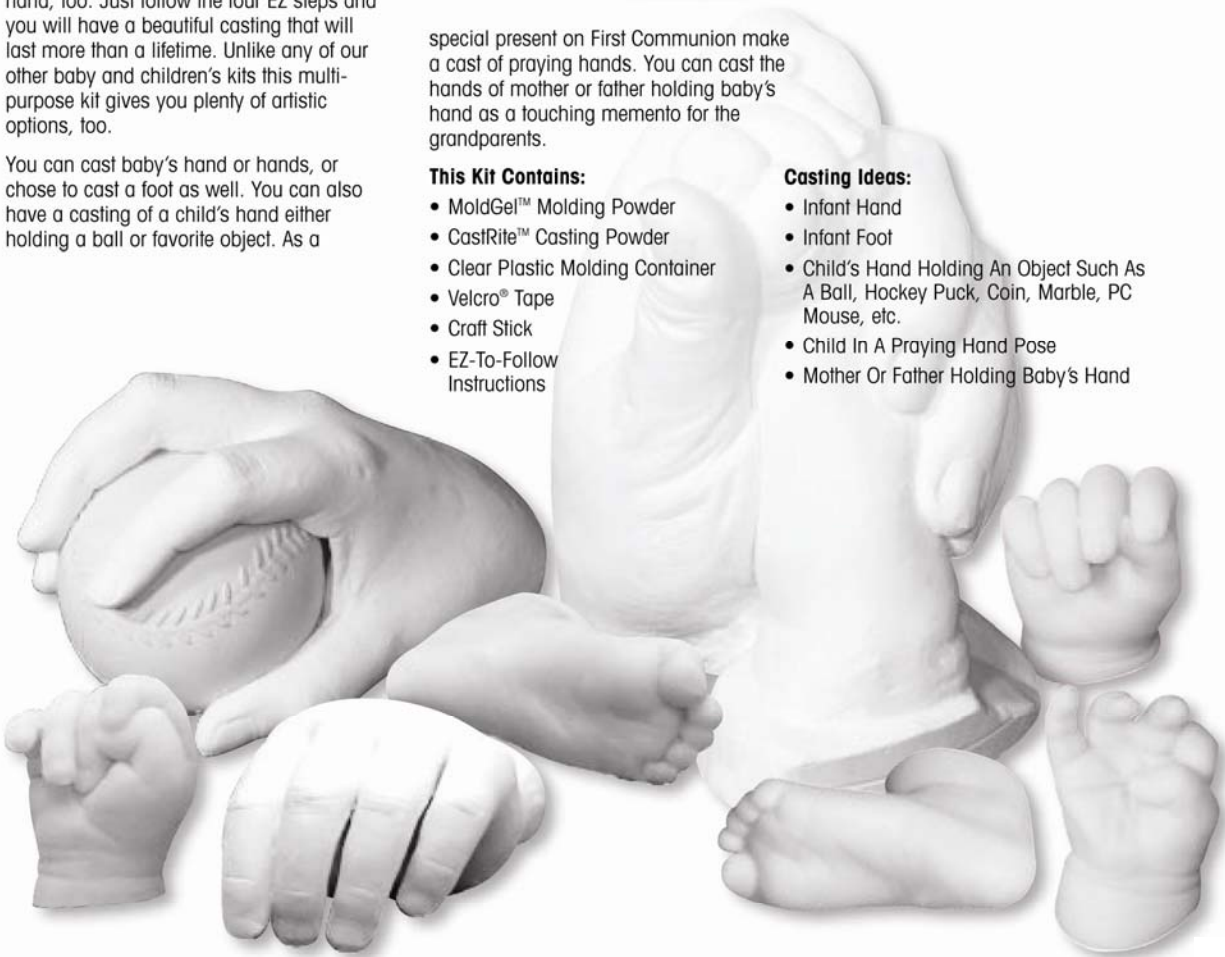

special present on First Communion make a cast of praying hands. You can cast the hands of mother or father holding baby's hand as a touching memento for the grandparents.

This Kit Contains:

- MoldGel™ Molding Powder
- CastRite™ Casting Powder
- Clear Plastic Molding Container
- Velcro® Tape
- Craft Stick
- EZ-To-Follow Instructions

Casting Ideas:

- Infant Hand
- Infant Foot
- Child's Hand Holding An Object Such As A Ball, Hockey Puck, Coin, Marble, PC Mouse, etc.
- Child In A Praying Hand Pose
- Mother Or Father Holding Baby's Hand

Casting & Molding Kits

EZ Cast Hands

ARTMOLDS EXCLUSIVE! BEST SELLER! For serious lifecasters that want to turn an artistic hobby into a part-time business. This kit will get you started casting hands for profit. It includes extensive instructions, permanent mold casting container and enough material to complete two adult hands together midway up the forearm. Material refills are available. Can be finished in bronze using our ColdKast Kit.

This Kit Contains:

- MoldGel™ Mold Powder
- CastRite™ Casting Stone
- Plasticine Clay To Support Long Fingernails
- Large Plastic Molding Container—Reusable
- (2) 2.5 Gallon Plastic Mixing Containers—Reusable
- Manual "Lifecasting Hands And Feet"
- Drop Cloth

ColdKast

Now you can create true-to-life metal cold casts without a gram scale or measuring cup...with the ArtMold's ColdKast Kit! ColdKast is the brand new kit that contains everything you need to duplicate the look and feel of hot-poured foundry castings at a fraction of the cost! One ColdKast kit is sufficient for a set of adult hands or two faces. Two ColdKast kits are required for a front torso casting or a full head.

EZ Cast Torso

BEST SELLER! EXCLUSIVE TO ARTMOLDS. Though larger than a face or head, casting the front torso is easier than it seems. Because of the broader surfaces and fewer undercuts even an inexperienced lifecaster will capture the model's torso without much difficulty the first time using the ArtMolds' Front Torso Casting Kit.

This Kit Contains:

- MoldGel™ Alginate-Based Mold Powder
- CastRite™ Casting Stone
- MoldEZ™—Skin And Mold Release
- GelSlick Alginate Bonder
- Plaster Bandages
- Faux Mohair To Bond MoldGel™ To Plaster Bandages
- Spackle
- Sand Paper
- Rubber Gloves
- Instructions
- Drop Cloth

EZ Cast Face

BEST SELLER! EXCLUSIVE TO ARTMOLDS! Casting the face is a bit more challenging than casting hands or a torso—but the satisfaction is so much greater. We believe that is because just as the "eyes are the mirror to the soul", the face is the reflection of the personality. Nothing has more instant recognition as the face. As with all of our kits they are assembled to be used by both the beginner as well as the accomplished artist. A major reason is that we use the highest quality molding and casting materials available.

This Kit Contains:

- MoldGel™ Alginate-Based Mold Powder
- CastRite™ Casting Stone
- Clay To Plug Nose Holes When Casting
- Plaster Bandages
- Faux Mohair To Bond MoldGel™ To Plaster Bandages
- Instructions
