

INPLAIS™ NON-SLIP RUG BACKING Concentrated Liquid Latex Rubber Compound

Used to secure area rugs in your living room, runners in the hallway, punch rugs, wall hangings, or even slippers that need a bit of extra grip while you're walking around.

DESCRIPTION: InPlais is a one-part (no weighing necessary), brush-on liquid, high in concentrated latex solids. InPlais is designed to help add a non-slip barrier to your floor rugs, preventing them from sliding, bunching, or causing accidents, even if they're on tile, laminate, or wood flooring. Avoid falls or slipping due to sliding rugs or carpet by applying InPlais, a bottom rugged adhesive that adds a slip-resistant barrier you can trust.

This innovative non-slip rug adhesive can be brushed onto the bottom of your rugs and carpets to give them a latex backing that keeps them from sliding or bunching up on tile, laminate, or hardwood flooring.

Fabric and Floor Safe – This rug bottom coating not only offers better high-traffic support for kids and families, it won't stain fabrics or scratch wood floors to ensure your flooring and your personal effects stay pristine.

SURFACE PREPARATION: Clean reverse side of rugs which InPlais will be applied. Use a vacuum to remove dust and any clinging debris or InPlais will not properly adhere to rug backing. Use a damp rag or sponge to further clean the surface. Avoid oils, petroleum jelly or oil clays as they will adversely affect your mold. Avoid application directly on metals. Test coat a small area to check for good release.

APPLICATION: Adding InPlais area rug backing to your fabrics is simple. Just flip them over and paint on the liquid coating. Once dry, the latex finish will provide a soft, flexible, non-slip barrier to reduce falls and spills.

After the first coat has become completely dry to the touch, add a second coat allowing the second coat to dry. InPlais dries to an almost invisible translucent. Drying may be carried out at room temperature. Drying time is about 3-hours. But the process will be greatly accelerated if a current of air from an electric fan can be directed across the surface

FEATURES

-)] Non-Skid Natural Latex
-)] Helps Prevent Accidents
-)] Washable, Flexible Finish
-)] Prevents Unraveling or Loosening of Fibers
-)] Easy to Clean with Soap and Water
-)] Available Size: 16 oz., 32 oz., 1-Gal

Color:	White	pH:	9.5 - 10.5
Base Polymer:	Natural Rubber	Weight:	7.90 lbs./gal.
Viscosity:	Paste	Total Solids:	75%

of the model. Heat up to 180° F. (using a hair dryer) can be used to further speed drying. The finished coating on the fabric must be thoroughly dried to obtain maximum physical properties of surface grip.

OTHER APPLICATIONS: Besides making rugs tightly grip surface, InPlais has other uses as well. You may use it to coat the bottom of slippers to prevent sliding on floors. You can use it to coat the reverse side of fabrics to keep threads in place. It is also useful to protect the reverse side of fabric wallhangings.

SAFETY AND CLEANUP: Remove wet InPlais with soap and cold water. Do not use warm or hot water as it will cause InPlais to cure. Dried InPlais can be softened with waterless hand cleaner. To remove from clothing, clean with dry cleaning solution.

STORAGE: Store at 50-70° F. Exposure to temperatures below 40° F. and above 80° F may damage latex, causing irreversible coagulation. **DO NOT ALLOW TO FREEZE.** Storage life is approximately twelve months from date of shipment.
